Build Your Cloud Business Applications with Power Platform

LEAF SOFTWARE SOLUTIONS BUSINESS PROCESS TRACKER

With a principle-centered approach, our people have delivered mission critical solutions to businesses just like yours for over 30 years.

WHAT WE OFFER

Built on the Power Platform, the Business Process Tracker automates complex processes, eliminates manual work, and enables fast decision making. Virtually any business process can be tracked, monitored, and acted upon to enable fast and reliable decision-making in your business.

- Automate, monitor, and track key processes
- Invoke follow-up protocols based on compliance / non-compliance
- Customize metrics and reporting to inform decision making

The business process tracking solution automates tasks and exposes critical information used in decision making. With 360-degree views of key metrics and milestones, all areas of business are informed.

Leaf Software Solutions can customize this application to your business.

See what customers are saying:

"Our focus has been on leveraging the best technology to keep our associates and residents safe. We feel we accomplished that by partnering with Leaf."

Tom McClelland, Executive Director - IT, CarDon

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together efficiently with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable uses to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
